Background

Generative artificial intelligence (AI) presents exciting opportunities as well as new responsibilities. This policy outlines how [Organization Name] intends to use generative AI now and in the future. It establishes clear guidelines for how employees and contractors should use generative AI-powered tools and reinforces our commitment to transparency, accountability, and responsible use.

Scope

This generative AI policy applies to all employees, contractors, and other personnel who act on behalf of [Organization Name], regardless of department, role, or location. It covers any generative AI tool used for work purposes, whether provided by [Organization Name] or accessed independently.

Definition

Generative AI is a technology that can turn user prompts into new content, including text, images, audio, code, and video. Examples include chat assistants, image generators, and writing or coding tools built on large language models.

Principles

[Organization Name] is committed to the following principles whenever generative AI is used:

Safety and Security

Generative AI should be used in a way that minimizes potential harm and protects the security of sensitive data.

Fairness and Inclusion

Generative AI should be used in a way that promotes equitable treatment of diverse users, employees, customers, and the communities we serve.

Validity and Reliability

Generative AI should deliver consistently accurate results, confirmed through human oversight and rigorous evaluation.

Transparency and Accountability

Information on how generative AI is developed, selected, and deployed should be readily accessible to relevant stakeholders, and a person remains accountable for every AI-assisted output.

Explainability and Interpretability

Generative AI use should be understandable to the users and stakeholders it affects, to encourage responsible usage and effective decision-making.

Innovation and Sustainability

Generative AI should be used in a way that fosters progress while aligning with [Organization Name]'s long-term goals and sustainability standards.

User Responsibilities

Employees and contractors of [Organization Name] using generative AI solutions are responsible for:

- Understanding and following this policy and any tool-specific guidance
- Ensuring the completeness and accuracy of any generative AI-created content
- Disclosing the use of generative AI where appropriate
- Protecting confidential, proprietary, and sensitive information
- Reporting unintended outputs or ethical concerns to the appropriate stakeholders
- Using only approved tools and accounts for work-related tasks
- Participating in required training sessions

Compliance with Related Policies, Agreements, and Laws

Generative AI usage must comply with all applicable laws and regulations, as well as [Organization Name]'s internal policies. This includes but is not limited to:

- Data protection and privacy laws and regulations
- Recordkeeping, retention, and disclosure obligations
- Intellectual property and copyright laws
- Contractual obligations with software vendors and customers
- Industry-specific or regulatory requirements that apply to [Organization Name]
- Acceptable use and information security policies

Confidentiality of Intellectual Property and Proprietary Data

Generative AI tools must not be used to create or transmit content based on:

- Personal data or other sensitive information about customers, employees, or third parties
- Internal strategy documents
- Proprietary research or datasets
- Confidential legal materials
- Unpublished financial or operational information
- Information from partners, customers, or vendors
- Any information that falls under non-disclosure agreements

→ **If you're not sure, contact your manager, IT/security team, or legal counsel before using generative AI.**

Usage Guidelines

Here are some common generative AI usage scenarios with best practices and tips for avoiding negative consequences.

Drafting Documents

With effective prompts, generative AI solutions can create documents of all types.

Do: Review the document for completeness and accuracy, make manual edits, and disclose your use of generative AI appropriately.

Don't: Include any confidential information in your prompt or ask generative AI to draft sensitive documents.

Summarizing Documents

Generative AI can help you quickly synthesize lengthy documents for clearer communication.

Do: Read and understand the full document thoroughly, and review the finished summary for accuracy and completeness.

Don't: Include confidential information in your prompt.

Rewriting Documents

Generative AI can help make important information more accessible by rewriting complicated documents in plain language.

Do: Specify the appropriate reading level in your prompt and review documents for accuracy.

Don't: Include sensitive information in your prompt.

Responding to Frequently Asked Questions

With effective prompts, generative AI can help draft answers to common questions from customers, clients, or the public.

Do: Protect personal data and give people a clear path to reach human assistance.

Don't: Assume that generative AI will understand every question or that it can replace humans in all interactions.

Permissible and Impermissible Uses and Tools

✓ Permissible Uses

Employees and contractors of [Organization Name] may use approved generative AI tools for the following tasks:

- Drafting, summarizing, and revising documents
- Assisting with routine responses to non-sensitive inquiries
- Supporting brainstorming and ideation
- Translating documents or simplifying complex text

It is essential that everyone follow established guidelines for reviewing generative AI-produced content and appropriately disclosing the use of these tools.

✗ Impermissible Uses

Employees and contractors may not use generative AI for:

- Generating content involving personally identifiable information or other confidential data
- Making final decisions that could affect individuals' rights, employment, or access to services
- Creating or spreading misinformation
- Replacing professional judgment or generating legal, financial, or medical advice

Only reviewed and approved generative AI tools may be used for official purposes.

Policy Enforcement

Violations of this policy may result in disciplinary action, up to and including termination of employment or contract. Specific consequences depend on the severity and nature of the violation and may include:

- Retraining on technology and data policies
- Revocation of access to generative AI tools
- Formal performance review
- Referral for further investigation

Policy Administration
